

ENGINEERING DESIGN – FACTORY INFRASTRUCTURE AND PROJECT MANAGEMENT

We are well equipped to meet the basic & detailed Engineering design services and has undertaken factory infrastructure designing and project management services. The designs are undertaken with efficient process engineering, automation in-compliance with product safety requirements meeting international food safety standards and Global best practices. All the following required engineering disciplines are in-house with us, thus working in close coordination resulting in minimum time.

01 OVERALL SUPERVISION

Understand user Requirement and optimal basic engineering....
