

FACTORY DESIGN & EPCM SOLUTIONS

We provide end-to-end EPCM (Engineering, Procurement & Construction Management) services for greenfield, brownfield and expansion projects. Our multidisciplinary teams take facilities from concept to commissioning—delivering projects on time, within budget and to global engineering, quality and safety standards.

Our engineering capabilities are further strengthened through our sister concern, Zen Consultech Pvt. Ltd. (Zen Group), which extends our in-house team with experienced architects and engineering professionals.

Together, we deliver fully integrated multidisciplinary engineering—from architecture and civil-structural design through MEP, HVAC and fire safety—providing coordinated engineering, faster execution and a single point of responsibility across greenfield developments, brownfield expansions and manufacturing modernisation projects.

Detailed architectural plans and structural design for industrial facilities.

DETAILS >

Process flow sheets, equipment sizing, and pipeline layout design.

DETAILS >

Clean utility design, MEP routing, HVAC systems, and loss prevention.

DETAILS >

PLC, SCADA, DCS configuration, instrumentation, and control loops.

DETAILS >

Complete lifecycle management from concept design to commercial run.

DETAILS >

Supervision, budgeting, bill certification, and timeline monitoring.

DETAILS >

Trial runs, safety interlock checks, and operational handholding.
